A Greener PWCS

The campaign
for a cleaner county

Who are we?

The student led organization, Healthy Environments Advance Life (HEAL), is a community organization led by a coalition of dedicated individuals who all share a common passion to spread awareness about the environment we inhabit.

Why the bins?

Recognizing the need to further conserve resources, as well as educate students on the importance of environmental sustainability and conservation, HEAL suggests the following outdoor recycling roadmap for schools throughout the Division. We hope to inspire many more schools and students to implement outdoor recycling programs using our guideline as a project-based learning opportunity.

Establishing the first outdoor recycling program at Colgan High School.

How did we do it?

our journey to

Keeping pwcs clean.
